

# The Quick4® Equalizer® 24 HD Chamber

**INFILTRATOR**  
SYSTEMS INC  
Environmental Onsite Wastewater Solutions™

**Infiltrator Systems Introduces New Heavy Duty Chamber!**

The Quick4 Equalizer 24 HD Chamber was designed to provide exceptional strength when used in heavy duty trench or bed applications. The chamber's enhanced features, which include an increased wall thickness, structural x-ribs and reinforced connection joints, make it one of the strongest Quick4 chambers available today. The Quick4 Equalizer 24 HD Chamber's Contour Swivel Connection permits 15-degree turns, left or right.

### The Quick4 Equalizer 24 HD Chamber Provides Increased Structural Integrity with These Unique Features:

- Chamber is 28% thicker making it significantly stronger than the original Quick4 Equalizer 24
- Continuous structural x-ribs on the chamber dome and underside corrugations provide extra support
- Additional material used at the inlet and outlet ends of chamber reinforce connection joints
- Thicker bottom corners of the chamber add greater stability
- Reinforced inspection port provides a stronger connection to the pipe
- The Quick4 Equalizer 24 HD Chamber supports wheel loads of 16,000 lbs/axle with only 12" of cover

### The MultiPort End Cap Offers These Unique Benefits:

- Tear-out seals on inlet ports provide a tight fit to the pipe
- Six molded-in inlets/outlets allow for maximum piping flexibility
- Multiple ports eliminate pipe fittings and make looping ends easy
- MultiPort end cap fits on either end of the Quick4 Equalizer 24 HD Chamber

*Note: The Quick4 Equalizer 24 HD chamber has the same dimensions and storage capacity as the Quick4 Equalizer 24 chamber.*
